ENTERED AT SAN FRANCISCO, CAL. AS SECOND-CLASS MATTER

NOW READY

A PRACTICAL AND COMPLETE CASE RECORD BOOK

The Practitioner's Case Book

For Recording and Preserving Clinical Histories

Prepared and Arranged by the Editorial Staff of the INTERSTATE MEDICAL JOURNAL

286 pp. Full Cloth Binding

Size: 9 1/2 x 12 in.

PRINTED ON BOND WRITING PAPER

80 Detachable Anatomical Charts in Colors for Making Pictorial Records of Fractures, Dislocations, Areas of Dullness and Other Pathological Findings.

The History Sheets are most comprehensive and arranged so as to reduce the labor of case-recording to the minimum.

The Anatomical Charts were specially drawn for the book by an artist-anatomist of note; they enable the practitioner to quickly record special lesions.

Price, express prepaid, \$2.00

If desired, this book will be sent on approval, charges prepaid, to any member of the Medical Society of the State of California.

INTERSTATE MEDICAL JOURNAL CO.

METROPOLITAN BUILDING - - - - - ST. LOUIS, MO.

REVIEWS

The editors may well feel that they have done a definite constructive work for the profession.—The Medical Times.

The present volume is perhaps the best arranged and most condensed book of this kind which has been published. This book can be cordially recommended to busy general practitioners.—Therapeutic Gazette.

... a practical book, one which shows the study and thought spent on it; one that will be a great help and value to the observing practitioner as well as to the writer on medical subjects.—New York Medical Journal.

This book is well arranged for purposes of case records. The history sheets are complete enough to cover all cases encountered in general practice. There is an excellent series of detachable anatomical diagrams printed in light colors so that pictorial records of fractures, dislocations, cavities, areas of dullness, etc., may be made by pencil or pen.—J'l Missouri State Medical Assoc.

(SEE PAGE XII)

IN THE "Fairchild" Preparations

the digestive enzymes are offered in every form desirable for therapeutic use by every accepted method of administration or application—internal, "topical," hypodermatic; also in forms of special availability in preparing foods for the sick, and in modifying milk for infants.

A new edition of "THE FAIRCHILD PREPARATIONS WITH DESCRIPTIVE NOTES," designed for convenient reference, has just been published—copy upon request.

We are always glad to co-operate in every possible way in furthering clinical investigation of products of the enzymes, or allied products, and we invite correspondence.

Think of Cutter's

When you have occasion to think of Antitoxin, think of Cutter's. It positively represents the last word in Antitoxin production. We have put the best that's in us into this product.

FOR SEVEN YEARS

we have striven to improve it. For seven years we have produced only biologics. Our ambition has been to excel in this one line and we candidly believe we have achieved it. But we want you to believe it. We want you to

PIN YOUR FAITH TO US

We know you will have no reason for a reaction.

If you prefer the Concentrated Antitoxin we can supply you.

Cutter's Antitoxin, GLOBULIN, is concentrated with due regard for the specific gravity of the blood and is of the smallest volume consistent with this idea. Over-concentration is a serious mistake. It implies slow absorption, and loss of time implies loss of efficiency.

Please specify "CUTTER'S", and encourage by your support a worthy California enterprise.

The Cutter Laboratory

Berkeley, Cal.

U. S. Government License No. 8

OBSERVE

That the indications for GARDNER'S SYRUP
AMMONIUM HYPOPHOSPHITE

are

Laryngitis, Pharyngitis, Bronchitis and Minor Coughs.

That you will not have to prescribe opiates or anodynes
in order to obtain the desired action.

That it is an active stimulating expectorant.

NOTE

That it will not be dispensed unless you specify
"GARDNER".

REMEMBER

That it is made from chemically pure Ammonium
Hypophosphite, sixteen grains to the fluid ounce.

That it is palatable.

Samples and literature will be gladly sent you, upon
request.

Firm of R. W. GARDNER,

P. O. Box 1525,

New York City.

Mulford's Antitoxin and the New Syringe

Advantages of New Syringe: ASEPSIS, contamination impossible.

Positive Working: The metal plunger screws into the rubber plug, adjusting pressure and making action positive.

Metal finger-rest with rubber guard at top of syringe prevents any possibility of syringe breaking or injuring operator's hand.

Needle attached with flexible rubber joint permits motion of patient without danger of tearing the skin—a great advantage in administering to children.

Our new adjustable rubber packing possesses great advantages; it is readily sterilized, does not harden, shred, absorb serum or become pulpy.

Simplicity and accuracy—no parts to get out of order.

Mulford's Antitoxin is Accepted Everywhere as THE STANDARD

The higher potency enables us to use much smaller syringes.
Minimum bulk—maximum therapeutic results

Concerning Malt Extracts

The manufacture of liquid malt extract for medicinal use is a highly specialized professional work and is successfully accomplished only under the direction of competent chemists. While in some respects similar to the brewing of beer, there are vital differences both in the materials which enter into these products and in the processes of manufacture.

ANHEUSER-BUSCH'S
Malt-Nutrine
TRADE MARK

the food-tonic

is the recognized standard of medicinal malt preparations of its class. The materials used in its manufacture are specially selected and safeguarded. Only the choicest Barley-malt and Saazer hops are used, and the finished product contains all of the soluble substances of these two materials.

Malt-Nutrine

is a perfect malt extract and should not be confused with cheap dark beers, many of which are represented to be medicinal malt products.

The Original and Genuine

IN CHRONIC DISEASES

The basis of a milk nutrient so delicious and digestible that it will prove a welcome relief to many of your patients from ordinary sick-room foods. Used with increasing confidence in the treatment of all acute and chronic diseases, because its nourishment is appropriated with the minimum danger of overtaxing digestion. The number of healthy, robust infants that are reared upon it every year attest its well balanced composition and uniform excellence.

That your patients may obtain the best as well as the original and genuine, always specify "Horlick's."

Samples Sent, Free and Prepaid, to the Profession, Upon Request

HORLICK'S MALTED MILK COMPANY,

Racine, Wis., U. S. A.

Illustration showing the tough, leathery curds of cow's milk, which has been coagulated by the addition of artificial gastric juice.

A prominent physician writes us:
**"You have struck the right note on the Food Question
 We have saved baby by the use of your Food when others failed"**

The reasons why

**ESKAY'S
 Aluminized
 FOOD**

"strikes the right note" in substitute feeding, is that it is both A MILK MODIFIER AND AN AUXILIARY FOOD

It modifies cow's milk and makes it more digestible, and it supplies the right food elements in the right proportions

The illustrations show the reasons for the ready digestibility of the Food, and the clinical results show the kind of tissues the Food makes

Illustration showing the soft, flocculent condition of the curd of cow's milk modified with Eskay's Food, and coagulated by the addition of artificial gastric juice.

NEW YORK

SUPRARENALIN

Its Superiority and the Reason

The vast superiority of Suprarenalin Solution places it in front, and this superiority is due to the fact that it is made from an absolutely ash-free crystalline active principle of the suprarenal substance. It is free from impurities, such as phosphates, etc. It is positively free from chemicals, like chloral and its derivatives. It is only a solution of Suprarenalin plus 7-10 of 1 per cent. chlorid of soda.

Suprarenalin Solution possesses the greatest keeping qualities of anything of the sort, American or European, natural or synthetic. Suprarenalin Solution is easily sterilized, as it may be boiled repeatedly.

SUPRARENALIN SOLUTION	1:1000
Suprarenalin Ointment	1:1000
Suprarenalin Inhalant	1:1000
Suprarenalin Triturates	1-70 of a grain

Customary Flannels Customary Colds

At this time of the year it is the custom to put on Flannels (woolen underwear) to protect the body from colds. Yet the colds are as customary as the Flannels! Not in spite, but because of them.

The Dr. Deimel Undergarments are in every respect the opposite of Flannels. They afford genuine protection and safety in the severest climate and season. They guard against chills and render the wearer free from all ills due to a weakened skin, such as colds, catarrh, bronchitis and rheumatism.

DIAMOND ANTISEPTICS, LILLY

YOU CAN'T MISTAKE THEM IN THE DARK

¶ The tablets are diamond shape and marked "POISON;" the bottle is of peculiar design—safeguarding users against error.

¶ Mercury Bichloride is first among the powerful germicides. The safest and best way to use it is in the form of Diamond Antiseptics, Lilly, which combine rapid solubility and certainty of germicidal action with the greatest safety possible.

Back View of Bottle
Containing 25 Large Tablets

¶ The tablets are hand-molded and their loose texture, angular shape and large surface render them rapidly soluble.

¶ A small amount of citric acid is combined with the bichloride which prevents precipitation of insoluble mercury in neutral solutions, hard water or when in contact with albuminous liquids.

¶ Solutions of Diamond Antiseptics are permanent and act with certainty on all septic matter, even in blood, pus, serum, etc.

¶ While soft or distilled warm water is best for solutions, Diamond Antiseptics dissolve quickly in moderately hard water—an important advantage in emergencies.

¶ They are made in two sizes—LARGE and SMALL, containing 7.3 grs. and 1.82 grs. of Mercury Bichloride respectively, and three colors—White, Blue and Pink. The large tablets are supplied in bottles of 25, 100 and 1000, also in pounds. The small tablets are supplied in bottles of 100, 500 and 1000.

¶ By specifying Diamond Antiseptics, "Lilly," you will take every precaution possible against inefficiency and error. Send request for samples to Indianapolis.

**No Uncertainty Now
In Digitalis Medication;**

**Results to-day—at once, if need
be—not “to-morrow,” with
‘Digalen’ as your medium.**

‘Digalen’ embraces all that excels in digitalis, all that exalts this drug above its rivals, all that makes it **the remedy in heart affections for which there is no succedaneum.**—“All the virtues of the drug in a nutshell, with the objectionable and toxic elements eliminated.” ‘Digalen’ acts with promptness and precision; will not provoke gastric irritation; is non-cumulative within the limits of the prescribed dosage. “The most delicate stomachs retain and absorb it readily,” declares a well-known physician.

‘Digalen’ is a sterile, stable solution of digitoxin amorphous Cloetta,—the one water-soluble digitoxin—and may be administered by mouth, enema, intravenous or intramuscular injection. Supplied in 1 Cc. ampullae (cartons of 6 and 12), and in 15 Cc. vials, each provided with a graduated pipette for measuring doses accurately. **Dosage, 8-16 min.**

Write **to-day** for a sample.

Mater Misericordiæ Hospital

Sacramento, California

CONDUCTED BY SISTERS OF MERCY

The best equipped hospital in Northern California, numbering among its patrons the most eminent medical and surgical talent in the State.

The hospital has a large class of nurses in training; has Sisters in charge in each department, and a Resident Physician to watch over and superintend the care of the patients. During the past year a new wing, consisting of thirty-five rooms, has been added, and many improvements have been made, such as the establishing of a maternity ward at a flat rate of \$25 per week.

The Surgery, located in a separate building, has been entirely remodeled—tiles being substituted for concrete. Four new rooms have been built, and the completed structure now boasts of three commodious and independent operating rooms.

The course of lectures for the Training Class is given by the following doctors: Dr. W. A. Briggs, Dr. G. E. Simmons, Dr. J. H. Parkinson, Dr. Henderson, Dr. G. L. Stevenson, Dr. J. W. James, Dr. E. C. Turner, Dr. G. L. Simmons, Dr. T. J. Cox, Dr. G. W. Dufficy, Dr. Chas. McKee and the Resident Physician, Dr. F. E. Shaw.

*"I now specify
Soft Mass Pills P.D.&Co.
exclusively"*

Therapeutic Notes (Sept. 1910) tells of a physician who had prescribed a certain brand of A. S. and B. pills for years, under the impression that no others would give him equal satisfaction. Casually he learned of our Soft Mass Pill No. 984 (A. S. and B.). He tried it. Note what he says:

"I am getting incomparably better results from your Soft Mass A. S. and B. pill than I did from Blank's hard pills. There is absolutely no comparison between them. I now specify Soft Mass Pills, P. D. & Co., exclusively."

Our Line of Soft Mass Pills.

(Chocolate-coated except No. 892.)

No. 892—Ferrous Carbonate (Blaud), 5 grs., round, uncoated.
No. 967—Cathartic Compound, U. S. P. Eighth Revision.
No. 968—Cathartic Compound, Improved.
No. 969—Quinine Sulphate, 2 grs.
No. 970—Cascara Compound No. 3 (Dr. Hinkle).
No. 971—Ferrous Carbonate (Blaud), 5 grs., U. S. P. Eighth Revision.
No. 975—Cholelith (round).
No. 977—Ferrous Carbonate (Blaud), Modified.
No. 981—Ferrous Carbonate (Blaud) Compound, B "C."
No. 982—Ferrous Carbonate with Nux Vomica.
No. 983—Blaud and Strychnine Compound, B "B."
No. 984—Aloin, Strychnine and Belladonna, B "A."
No. 985—Aloin, Strychnine and Belladonna Compound, N. F.
No. 986—Cathartic Compound Granules, $\frac{3}{4}$ gr.

No. 987—Emmenagogue, Improved.
No. 988—Evacuant.
No. 990—Camphor, Opium and Lead Acetate.
No. 991—Camphor, Opium and Tannin.
No. 992—Opium and Camphor, N. F.
No. 993—Quinine, Iron and Zinc Valerianates.
No. 994—Quinine Valerianate, 2 grs.
No. 995—Salol, $2\frac{1}{2}$ grs.
No. 996—Salol, 5 grs.
No. 997—Salol and Phenacetine.
No. 998—Warburg Tincture, N. F., representing $\frac{1}{2}$ fluidrm.
No. 999—Warburg Tincture, N. F., representing 1 fluidrm.
No. 1000—Warburg Tincture without Aloes, N. F., representing 1 fluidrm.
No. 1001—Alphen.

NOTE.—In the soft-mass process no heat is applied, hence such volatile substances as camphor, the valerianates, the essential oils, etc., are preserved in full measure.

Soft Mass Pills (P. D. & Co.) dissolve readily in the digestive tract. They are attractive in appearance. They keep well. They are absolutely true to formula. Ask your druggist to dispense them on your prescriptions.

Lane Hospital Announcement

Lane Hospital has recently been enlarged, renovated, and improved. A story has been added, increasing the capacity to one hundred and seventy-five beds. The operating rooms have been remodeled and a new top-lighted and thoroughly equipped laparotomy room added. The new arrangements increase the convenience and double the capacity of the surgical department, while the same high standard of efficiency in the operating room service will be maintained as in the past.

A Maternity Department has been established, consisting of a number of well-lighted, isolated rooms, in close relation to a completely equipped delivery room.

Two Children's Wards have been opened, and particular attention will be paid to the care and nursing of children.

The Eye and Ear Department has been provided with special wards, special nurses and separate treatment rooms.

The X-Ray Department is located in the new portion of the hospital and has been provided with every convenience for examination, treatment and laboratory work. An entirely new set of the latest and most efficient apparatus has been installed.

Roof Garden. A special feature of the recent addition is a well-protected roof garden where convalescents may enjoy fresh air and sunlight and where patients may be given the benefit of outdoor treatment.

While the Faculty of Cooper Medical College acts as a medical and surgical staff to the hospital, the privileges of the institution are freely open to all regular physicians in good standing. Physicians having patients in Lane Hospital are assured of every professional courtesy.

Communications may be addressed to the resident physician.
